

FOR IMMEDIATE RELEASE

## MacGyver Solutions Inc. Named Authorized Commercial Reseller for Massimo Motor Products

**Strategic partnership expands access to Massimo's utility vehicles for government, institutional, fleet, and enterprise customers nationwide.**

**PINEHURST, N.C. — 21 July 2026** — MacGyver Solutions Inc., operating through its commercial mobility division, **MacGyver Motors**, today announced that it has been appointed an **Authorized Commercial Reseller** of Massimo Motor Sports, LLC products, expanding the company's portfolio of commercial transportation and utility solutions for organizations across the United States.

Under the agreement, MacGyver Solutions will market and supply Massimo's lineup of utility task vehicles (UTVs), all-terrain vehicles (ATVs), golf carts, accessories, replacement parts, and related products to qualified commercial end users, including government agencies, municipalities, educational institutions, corporate fleets, hospitality organizations, industrial facilities, campuses, resorts, and rental operators. The relationship establishes MacGyver Solutions as a commercial reseller focused exclusively on business-to-business and institutional markets.

"Massimo has earned a reputation for delivering dependable, feature-rich vehicles that provide exceptional value across a wide range of commercial applications," said **Mike Jackson, President of MacGyver Solutions Inc.** "This authorization strengthens our ability to deliver turnkey mobility solutions that help organizations improve operational efficiency, reduce costs, and better serve their employees and customers. We are excited to bring the Massimo product portfolio to our commercial clients."

The addition of Massimo Motor products enhances MacGyver Solutions' growing portfolio of commercial equipment and mobility offerings, providing customers with scalable solutions for transportation, maintenance, security, logistics, grounds operations, and fleet management.

Unlike traditional consumer retail channels, MacGyver Solutions' commercial sales model is designed to support organizations requiring fleet procurement, institutional purchasing, and customized vehicle solutions. Customers will continue to receive the benefit of Massimo's standard manufacturer warranty while working directly with MacGyver Solutions throughout the procurement process.

The partnership reflects MacGyver Solutions' continued investment in delivering innovative technologies and equipment that address the evolving operational needs of public and

private sector organizations. By combining consultative sales, responsive customer service, and access to leading manufacturers, the company is positioned to help commercial customers deploy reliable vehicle solutions tailored to their unique operating environments.

“Organizations today need partners who understand their mission as much as their equipment requirements,” Jackson added. “Whether supporting a municipal fleet, a university campus, a resort property, or an industrial operation, our goal is to provide dependable products backed by knowledgeable service and long-term customer relationships.”

Massimo’s commercial vehicle lineup offers solutions for applications including facility maintenance, campus transportation, public safety, parks and recreation, hospitality services, industrial operations, agriculture, construction support, and last-mile utility transportation.
